experience

freelance ux designer • self Present

Design and develop websites and user interfaces for individual clients; current clients include small business owners in need of improved marketing and a front-facing website for their clientele.

web developer • recordsone 2019

Rewrote integration tests for the RecordsOne R1 software in its latest release to implement new standards and data-driven programming. Utilized React to code tests and Jenkins for deployment.

web designer • rit magic spell studios 2018

Redesigned templating themes for a custom website building framework to reflect modern design guidelines as part of an NIH-funded research project for documenting patient case studies.

extracurricular

secretary • user experience club 2019-2020

Designed email and social media campaigns for the User Experience Club at RIT. Marketed for upcoming events and recruitment of new club members.

student ambassador • ist dept 2016-2019

Represented my major for the Information Sciences and Technology (IST) department at RIT. Led student information sessions, tour guides, and events for the department and formed the Events Committee.
